Did You Know?

Peripheral Nerve Repair

Chronic nerve pain doesn't have to be a life sentence. Many patients aren't aware that advanced surgical options exist to address the problem at its source.

Are You Experiencing?

- ✓ Nerve pain after surgery
- ✓ Painful scarring
- ✓ Nerve tumors
- ✓ Drop foot
- ✓ Failed nerve stimulators
- ✓ Concern for Complex Regional Pain Syndrome (CRPS)
- ✓ Poorly controlled diabetic neuropathy

Our Solutions Include:

- ✓ Nerve transfers
- ✓ Scar revision
- ✓ PRP / Stem cell injections
- ✓ Reset Neurectomy
- ✓ Targeted Muscle Reinnervation (TMR)
- ✓ Nerve decompression & graft repairs
- ✓ Regenerative Peripheral Nerve Interface (RPNI)

At Glass City Orthopaedic & Spine Center at The Toledo Clinic, Dr. McKray Smith uses advanced surgical and biologic techniques to restore function and help patients move forward with confidence.
