

Did You Know?

Total Ankle Joint Replacement

For patients with severe ankle arthritis, total ankle replacement can be a life-changing alternative to ankle fusion — restoring motion, reducing pain, and helping them return to an active lifestyle.

Are You Experiencing?

- ✓ Chronic ankle pain or stiffness
- ✓ Difficulty walking or standing for long periods
- ✓ Limited ankle range of motion
- ✓ Pain after previous ankle injury or fracture
- ✓ Failed ankle fusion or prior surgery

Our Solutions Include:

- ✓ **Patient-Specific Total Ankle Replacement:** 3D-planned with precision-guided instrumentation tailored to each patient's anatomy.
- ✓ **Deformity Correction & Reconstruction:** Restoring alignment, balance, and natural motion even in complex cases.
- ✓ **Advanced Tissue Techniques:** Orthoplastic methods that protect nerves, tendons, and skin for optimal healing.
- ✓ **Revision & Salvage Expertise:** Correcting failed fusions or implants to restore comfort and function.
- ✓ **Personalized Recovery Program:** Structured physical therapy and post-operative care to help patients return to active living.
